New, Sept. 2, 1844
My Dear Edw.

A busy time, before I set off for Continent. This is list of determinations of Baker's coll. by Oliver & me.

Make a copy & send word to subscribers, & send this original to Mr. Watson at Cambridge.

The plants pay for the copy of Griseb. J. de W. 2d, which Hooker sent to Dr. Griseb.

Mr. Baker is to send to you for the Kew & other sets of Fendler's Ferns, as soon as he collects these many of the other subscribers - very soon. If any delay, write to him. He has the business in his hands.

DeCandolle's trip have been here & leave for Continent to-day. Mrs. Gray & I have been most enjoyably busy every moment. When I get time I will write to you a better letter.

Ever yours
Albany

- Acrostus arvensis, Schult
- 66. Datura arborea, L.
